

PLAYWRIGHT MASTERS

PRACTICAL AUTOMATION TRAINING • HYDERABAD

PLAYWRIGHT

Automation Testing Course

Build browser tests.
Create reusable frameworks.
Learn to work with confidence.

CLASSROOM + ONLINE | 2-3 MONTHS

FROM FUNDAMENTALS TO FRAMEWORKS

Learn Playwright with TypeScript, reliable browser automation, API testing and framework design through guided practice.

YOUR TRAINER

P. Sandeep

Automation Testing Trainer • 10+ years in testing & QA

Build your Playwright skill set

A practical progression from testing concepts to maintainable automation.

01 Testing & programming foundations

Testing concepts, JavaScript and TypeScript fundamentals, asynchronous code and practical test design.

02 Playwright setup & browser automation

Install Playwright Test, organize a project, use locators and automate browser interactions.

03 Assertions & reliable synchronization

Use web-first assertions and auto-waiting. Handle dialogs, frames, tabs and common UI workflows.

04 Framework design & test organization

Page Object Model, fixtures, hooks, test data, isolated browser contexts and reusable components.

05 API testing & authenticated workflows

Validate APIs, prepare test data and reuse authenticated sessions with storage state.

06 Debugging, reporting & CI/CD

Trace Viewer, screenshots, reports, parallel execution, cross-browser testing, Git and CI pipelines.

Ask the trainer about the programming track, practical assignments and tools included in your selected batch.

Learn by building

Turn course concepts into browser automation you can explain and maintain.

PRACTICAL EXERCISES

Login & form workflows

Validate user input, successful login, error states and common form interactions.

End-to-end user journeys

Practice multi-page flows, reusable page methods, assertions and test-data handling.

Framework & execution workflow

Organize tests, capture results, investigate failures and connect execution to a pipeline.

WHO CAN JOIN?

Fresh graduates, manual testers, QA engineers and working professionals moving into automation. Programming fundamentals are covered before advanced framework work.

CAREER PREPARATION

Resume guidance, mock interviews and interview preparation support your job search. Placement assistance is support, not a job guarantee.

Start with a free demo

Ask about your learning track, current fees, batch timing and plan inclusions.
